ABOUT ME

Full-stack developer with expertise in React.js, Node.js, and modern web technologies, experienced in developing real-time and scalable applications. Proven ability to solve complex problems under pressure through hackathon participation and project development. Focused on writing clean, efficient code and building secure, high-performance systems.

HACKATHON JOURNEY

Runners Up - ElectroSphere 2k26

Swaminarayan University

2026 Gujarat

<https://secure-comm-jade.vercel.app>

- Secured 2nd position in a competitive technical Hackathon
- Collaborated with a team to design and implement a solution addressing real-world challenges within a limited timeframe.
- Contributed to technical development and project implementation.

Hackathon - SU Hackathon

Sangam University, Bhilwara, Rajasthan

2026 Rajasthan

<https://cers-plus.web.app/>

- Collaborated with a team to design and develop an innovative solution addressing real-world challenges within a limited timeframe.
- Contributed to technical implementation, project development, and problem-solving throughout the hackathon.
- Demonstrated strong teamwork, communication, and adaptability while working under pressure.

Smart India Hackathon (SIH) 2026

Selected for Online First Round | 2026

2026 Gujarat

- Developed a solution to assess regional risks and identify safer routes using rainfall, terrain, and landslide data.
- Selected for the online first round with SauraRoute, an AI-powered risk-aware logistics platform for the North Eastern Region (NER).
- Collaborated with a team to develop an innovative solution addressing real-world transportation and accessibility challenges.

SKILLS

Full Stack Ecosystem

HTML	CSS	JavaScript	React.js	React-Native
Node.js	Vercel	Git& GitHub	C / C++	MongoDB
Postman				

EDUCATION JOURNEY

Bachelor of Engineering

Swaminarayan University

2025-2029

12th Grade

Gyanmanjari Sec. and High Sec. School, Bhavnagar

10th Grade

Shree Gyanmanjari School, Bhavnagar

MY PROJECTS

Secure-comm (Middleman Attacks)

Built a secure communication platform implementing encryption to ensure confidential message transmission and protect against man-in-the-middle attacks.

[Github](#) [Live Project](#)

CERS (Medical SOS System)

Developed a medical SOS application designed to send emergency alerts and provide quick assistance during critical situations. Enabled users to trigger instant notifications and share essential information for faster response.

[Github](#) [Live Project](#)

Meta-Glasses-Reviews

Built a Meta Glasses review platform featuring product details, user reviews, ratings, and interactive UI. Implemented REST APIs for review management and ensured a responsive and user-friendly experience.

[Github](#) [Live Project](#)

Inventory-tracker

Built Shelf Scout, a full-stack inventory platform providing real-time shelf-level product availability across nearby retail stores. Implemented live inventory tracking and product reservation features to help users check stock before visiting stores.
